According to the information of Headquarter of ES and Civil Defense in Sugd region no serious emergency situations were recorded.

**3. The main problems related to natural and technogenic ES in Taboshar - representative of the Executive Body of the State Power of Taboshar city (20 min)**

The Executive Body of the Government of Taboshar city made an extending review of the problems of technogenic and natural ES in the city. So, it was noted that 2 out of 4 mudflow ways of cities are in bad condition, require bank protection works and cleaning up the mudflow protection bars in these small canyons. Dumps of poor ore (radioactive tailings), totaling more than 20 million tons remains an important problem for the city for many years. The surfaces of tailings are washed out because of the mudflows and it causes the migration of radio nuclides down the small canyon. The city administration called REACT partners to hold practical exercises of ES on rehabilitation of the protective layer of soil and tailings surface and bank protection work in this place. This proposal was supported by Headquarter of ES and Civil Defense in Sugd and REACT partners.

**4. Presentation of "Systems of monitoring and Early Warning in Tajikistan"- Kurbanov, J., Project Analyst of UNDP, Dushanbe (20 min)**

In his presentation, Mr. Kurbanov told the participants of the meeting about the work of this system, which was created in 2009 with the initiative of UNDP and government of Tajikistan. The scheme of co-ordination and information exchange on the preparation of monitoring reports and early warning, forecasting in Tajikistan presented in detail. In their turn, many participants expressed their opinion that this system should be further developed in the aspect of forecasting, as this process is quite complicated and requires additional expertise, survey of population and, etc., It was stressed particularly that
